

1. (3 points) Basic knowledge of html is needed in this class. Please use the countryList.xlsx in the Excel folder to make a web page using any language you know(or no language at all). You can refer to https://www.w3schools.com/html/html_tables.asp to get the syntax. Benchmark the execution time of your code.

2. (2 points. Elective) can you make a table like this?

ABC	ABC	ABC		ABC
Item1	Item1	Name1	Price1	Item 1
		Name2	Price2	
		Name3	Price3	

3. (2 points. Elective) Can you make your code 5 times faster? Especially when the size is very large (say 1000x100)?
